Introducing the new
PBTOne Containers

NAVBRIDGE

PBT Containers is pleased to bring you the new PBTOne Containers system which is based on the market leading NavBridge solution from Navare Solutions.

From the PBTOne Containers web application you can create new jobs, complete event activities including dehire, hub and storage options, edit jobs and view job history. The PBTOne Containers web application also provides real-time visibility of container movements, PODs including photos directly from a tablet based driver app.

There are a number of ways to access PBTOne Container services, including the web based portal, API and EDI integration.

PORTCONNECT

Our recently launched PBTOne Containers system is integrated with port systems across New Zealand via PortConnect APIs. Ports covered by PortConnect include Ports of Auckland, Port of Tauranga, Lyttelton, Northport and Timaru Container Terminal, as well as their satellite ports MetroPort Auckland and Christchurch, Bay of Plenty Freight Hub(Triton Ave) and South Auckland Freight Hub (Wiri).

This allows PBT Containers to deliver a leading service-focused container transport solution with real-time information for freight forwarders, importers and exporters throughout New Zealand.

PBT
Express Freight Network

PBT's nationwide container fleet provides you a true national container movement service. Our container fleet is complemented by access to PBT's independent CFS facilities at key port locations as well as PBT's coastal, rail and road based Express Freight Networks. We handle over 50,000 container moves each year giving you confidence that PBT has the systems and capacity to meet your national landside container management requirements.
